

# YOUR SECURITY CHOICE

Quality from experience  
**made in Italy.**

# Index

**AMC Elettronica** was founded in 1974 and the first product designed by the company was in collaboration with the University of Pavia - this being the Microwave detector "RIVELA". It immediately obtained a huge response in the Italian and the foreign market. Within a few years the Company established itself as a successful player within the Security Sector despite this to be still an unknown sector in the Italian Industry, the most impact caused by the high quality design and local production of the detectors. In the 80's AMC decided to launch the Alarm Control Units, Diallers and Sirens to the already now well established detector market. In the mid 80's the EL80 was launched - the first AMC' Alarm Control Unit, while four years later the first dialler with vocal synthesis, the CT901SV was introduced to the market. The 90's indicated a revolutionary change in the security market and AMC was ready to meet this demand by launching the first remote controllable and radio system. AMC, always moving with the times, on and on this occasion, at the Milan's International Security Fair in 98' presents the C136 Alarm Control Unit, a fully pc programmable system via modem, and the CR100 system, a completely lithium-ion battery supplied radio alarm system.

Today AMC has a well established international distribution network, featuring excellent products, "made in Italy" and especially paying attention to detail when designing the products. This has been well recognised in the industry, testimony to this is the numerous awards received for meeting customer needs and expectations. AMC is a wholly Italian owned company. Their main activity is the production and the commercialisation of Alarm components. The company's headquarter is in Alzate Brianza which is located near Como and only 30 km north of Milan, which can be reached with ease via the A4 and A8 highway - pretty centrally and easily reachable from all 3 main Airports, i.e. Bergamo, Milano Linate and Milano Malpensa. AMC has a test laboratory and a fully automated production line for the SMT technology electronic boards. To greater guarantee the product, the business seeks further approval from outside authorities, authorised to inspect the equipment continuously to allow to maintain the high quality.

# HYBRID CONTROL PANELS

## K Series

EN 50131 / GRADE 2 / CLASS 2

K4V

K8V - K8plusV

The K Series are hybrid control panels (wired and wireless input) designed for building protection. EN 50131, Grade 2, Class 2 approved. They are equipped of 4/8 zones, expandable to 16/64. It is possible to obtain more zones by double and triple EOL split line (K4V - K8V).

- PSTN line on board (voice beep calls\*\*, Contact ID, SIA fsk).
- IP module - LAN, Wi-Fi, Video\* (DC09 IP protocol for Contact ID and SIA IP, TCP/IP, video verification/video analysis\*).
- Easy to install plug-in 4G module that allows the system to communicate on a GSM network (voice beep calls\*\*, SMS, Contact ID, DC09 IP protocol for Contact ID and SIA IP).
- LAN or GSM communication carriers can be used as a primary or secondary communication channel (backup).
- It allows simultaneous communication from the control panel to multiple destinations such as the AMC Cloud, Surveillance and APP.
- Standard communication protocol (SIA, Contact ID) which sends an alarm signal to the Surveillance.
- Sending of events in SIA IP protocol on TCP/IP to standard IP receivers.
- PUSH notification system and system status information.
- The programming can be done locally with keypad or PC software (via cable or remotely).

\*\* The K Series have not voice synthesis, the calls are made with beeps

### VIDEO VERIFICATION

(Optional with IP-1 V module)

### VIDEO ANALYSIS

(Optional with IP-1 V module)

- \* PSTN on board
- \* 2G/4G module (optional)
- \* IP module (LAN, Wi-Fi, Video) (optional)
- \* BUS line (4 wires) RS485
- \* CMS multiformat
- \* Settable by PC

With one camera, up to 4 sectors can be set up that can be matched to alarm zones

- \* Compatible with several models and brands of cameras available on the market
- \* Images and videos can be stored for 48 h
- \* Up to 8 cameras can be managed
- \* You can set up from 1 to 3 snapshot with one-second intervals
- \* New control panel menus for the configuration of all cameras available on the market (speed dome, mini dome, bullet)
- \* You can request video recordings at any time through the App

The K Series control panels can be managed by App with IP module and/or 2G/4G module

# WIRED SYSTEM ACCESSORIES

FOR **K&X** SERIES AND **VITA** CONTROL PANELS

## Unika

### Touchscreen keypad

Unika is the AMC touchscreen keypad with 5-inches screen and ABS thin cover. It is equipped with an intuitive graphical interface user friendly. With just few steps you can manage all the functions of the keypad. Large screen and cool design make the Unika keypad a UNIQUE product up to date.

- SD card reader for image loading, FW upgrading
- NFC reader for smartphone recognizing
- Microphone and speaker
- Temperature sensor
- Vocal memo
- Photo frame screensaver
- Thin cover
- Wall installation
- Dimensions: W 155, H 100, D 18 mm

- ✿ Display 5 inches TFT high resolution (480 x 272)
- ✿ User friendly icons interface
- ✿ RFID/NFC integrated tag reader

# LCD Keypads

FOR **K&X** SERIES AND **VITA** CONTROL PANELS

## K-Lcd Blue Tag

32 characters LCD keypad with RFID/NFC tag reader

Lcd keypad with RFID/NFC integrated tag reader. Backlight liquid crystal display 32 characters on two lines. Two configurable lines as inputs and/or outputs; 3 signalling LEDs. Protective front door. Programmable keys for quick commands. Dimensions: W 135, H 116, D 24 mm

## K-Lcd Blue

32 characters LCD keypad

EN 50131 / GRADE 2 / CLASS 2

Backlight liquid crystal display 32 characters on two lines. Two configurable lines as inputs and/or outputs; 3 signalling LEDs. Protective front door. Programmable keys for quick commands. Dimensions: W 135, H 116, D 24 mm

## K-Lcd Light Plus

Compact 32 characters LCD keypad

Backlight liquid crystal display 32 characters on two lines. Two configurable lines as inputs and/or outputs; 3 signalling LEDs. Protective front door. Programmable keys for quick commands. Dimensions: W 86, H 114, D 23 mm

## K-Lcd Light

Compact 32 characters LCD keypad

Backlight liquid crystal display 32 characters on two lines; 3 signalling LEDs. Protective front door. Programmable keys for quick commands. Dimensions: W 86, H 114, D 23 mm

# WIRED SYSTEM ACCESSORIES

FOR K&X SERIES AND VITA CONTROL PANELS

## KX-AL

### Remote power supply

KX-AL is a remote power supply controlled from panel via bus RS485.

- Main power 230 V or 110 V
- Output Power 27 W (13.8 Vdc @ 2A) + 8 W for backup battery charger
- Battery charger with different selections (18Ah and/or 7Ah)
- Electronic overcurrent and overload protection
- Tamper for remove and opening system
- 8 inputs and 3 outputs expansion
- Completely diagnostic checks with panel and monitoring software

- Possibility of use in stand-alone mode
- Possibility to use up 2 power supply for each panels installation
- Dimensions: W 315, H 388, D 95 mm

## IP modules for connecting panel to Cloud (only for K&X Series)

Usable for CMS messages, Cloud service, App management, remote programming, etc.

### IP-1

IP module for connecting panel to Cloud.

### IP-1 V

IP module for Video Verification & Video Analysis

- Internal memory to store images and videos for 48 h
- Up to 8 cameras can be managed
- From 1 to 3 snapshot with one-second intervals
- From 1 to 4 programmable sectors combined with different zones per camera
- Alarms via HTTP
- New control panel menus for the configuration of cameras

### IP-1 W

IP module with **Wi-Fi on board**, for connecting panel to Cloud without cables by connecting with home Wi-Fi network.

## Communication modules for mobile network

Usable for voice call, SMS, CMS messages, Cloud service, App management, remote programming, etc.

### X GPRS

#### GPRS module

(only for K&X Series)

850/900/1800/1900 MHz

### X 4W

#### 4G module

(worldwide)

Check the 4G frequencies on AMC website

## KX-PB

### Transponder

Proximity device for arm, disarm and partial arm the control panel. IP54. To use with KX-TAG and KX-KEY. Available colours: white  
Dimensions: W 86, H 100, D 33 mm

## KX-PS

### Transponder

Device for civil series with 1 unit. Four signalling leds for system status and control. To use with KX-TAG and KX-KEY. Dimensions: W 30, H 20, D 50 mm

## KX-TAG

Badge with RFID tag, for arm and disarm the control panel.  
Dimensions: 85 x 54 mm

## KX-KEY

Keychain in ABS black and metal, with RFID tag for arm and disarm the control panel.  
Dimensions: 55 x 32 mm

## COM/USB

Adapter for programming control panels

## KX-IN

KX-IN is a **8 zones expansion module** with auto protection tamper box.  
Dimensions: W 106, H 80, D 25 mm

## KX-OUT

KX-OUT is a **3 relay outputs expansion module** with auto protection tamper box.  
Dimensions: W 106, H 80, D 25 mm

## Wireless expanders

Two-way wireless system

### K-RADIO800

32 characters LCD keypad with an integrated radio receiver

868 | 866 | 869.675 | 916 | 921 MHz

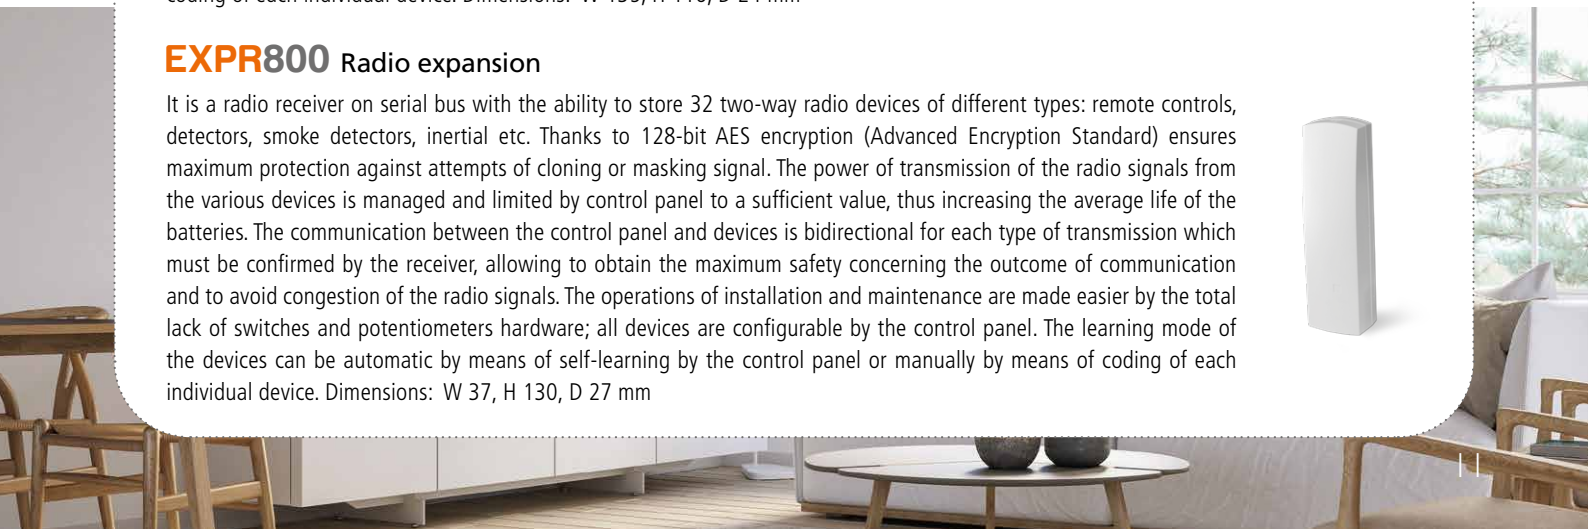

It is a keypad with an integrated radio receiver on serial bus with the ability to store 32 two-way radio devices of different types: remote controls, detectors, smoke detectors, inertial etc. Thanks to 128-bit AES encryption (Advanced Encryption Standard) ensures maximum protection against attempts of cloning or masking signal. The power of transmission of the radio signals from the various devices is managed and limited by control panel to a sufficient value, thus increasing the average life of the batteries. The communication between the control panel and devices is bidirectional for each type of transmission which must be confirmed by the receiver, allowing to obtain the maximum safety concerning the outcome of communication and to avoid congestion of the radio signals. The operations

of installation and maintenance are made easier by the total lack of switches and potentiometers hardware; all devices are configurable by the control panel. The learning mode of the devices can be automatic by means of self-learning by the control panel or manually by means of coding of each individual device. Dimensions: W 135, H 116, D 24 mm

### EXPR800 Radio expansion

It is a radio receiver on serial bus with the ability to store 32 two-way radio devices of different types: remote controls, detectors, smoke detectors, inertial etc. Thanks to 128-bit AES encryption (Advanced Encryption Standard) ensures maximum protection against attempts of cloning or masking signal. The power of transmission of the radio signals from the various devices is managed and limited by control panel to a sufficient value, thus increasing the average life of the batteries. The communication between the control panel and devices is bidirectional for each type of transmission which must be confirmed by the receiver, allowing to obtain the maximum safety concerning the outcome of communication and to avoid congestion of the radio signals. The operations of installation and maintenance are made easier by the total lack of switches and potentiometers hardware; all devices are configurable by the control panel. The learning mode of the devices can be automatic by means of self-learning by the control panel or manually by means of coding of each individual device. Dimensions: W 37, H 130, D 27 mm

# WIRELESS SYSTEM ACCESSORIES

## 800 Series

EN 50131 / GRADE 2 / CLASS 2

Compatible with all the AMC control panels

**LARIO** | **VITA** | **KSeries** | **XSeries**

800 Series communicates with the control panel by a bidirectional digital radio transmission channel to avoid signal collisions or band saturation and ensure high stability and precision. The 128 bit AES encryption code guarantee an high security.

## Accessories

### K-LARIO

#### Wireless keypad

(Compatible only with LARIO control panel)

It has 4 signaling LEDs for arm/disarm status and anomalies. It is powered by 3 AAA batteries, or with external 12V power supply. It allows 3 programmed profiles and button for enable/disable scenarios. Dimensions: W 135, H 116, D 24 mm

Order Code: **K-LARIO**: 868 MHz

### OUT800

#### Wireless output board

(Compatible only with LARIO control panel)

It is a expansion board with 2 free contact relay (COM - NC - NO) (5 Amps) for scenery building automation. It is powered by external power of 12 Vdc. It is also supervised (automatic life test). It has autoprotection tamper box. Dimensions: W 106, H 80, D 25 mm

Order Code: **OUT 800**: 868 MHz

### RP800

#### Wireless repeater

It is able to repeat all the signals coming from all wireless systems 800 Series: 32 wireless devices, 20 keyfobs, 4 wireless keypads, 4 wireless sirens. It is powered by external power of 12Vdc and it has rechargeable batteries with duration of 24/48h without main power. It is programmable via software with wireless devices codes or in self learning mode. Dimensions: W 106, H 80, D 25 mm

Order Code: **RP 800**: 868 MHz

### TR800

#### Pocket remote control

Programmable 4 channels radio remote controller. The standard lithium-ions battery allows a very long duration.

Dimensions: W 42, H 58, D 13 mm

Order Codes:

**TR 800-WG**: 868 MHz, white with grey keys

**TR 800-GW**: 868 MHz, grey with white keys

**TR 800-BG**: 868 MHz, black with grey keys

## Two-way wireless system

868 | 866 | 869.675 MHz

916 | 921 MHz

## Detectors

### IFV800

#### Wireless PIR detector with integrated Wi-Fi camera

It is a PIR detector with a high resolution camera. The transmission of the pre-post alarm video is sent through the integrated Wi-Fi module on board and view with the App AMC Plus.

The transmission by Wi-Fi technology allows fast data exchange with the Cloud, consequently IFV800 is very performing in terms of upload video time and quality in case of alarm. It is possible modify the quality of video with internal menu of detector that can be programmed direct via Wi-Fi. It is equipped with an infrared illuminator for low level light of the room. The images are sent to the Cloud through the home Wi-Fi network. It is provided with an anti-opening tamper protection. It is also supervised (automatic life test).

The system can be managed through the App **AMC Plus**:

- DOWNLOAD PRE-POST ALARM VIDEO FROM CLOUD
  - VIDEO RECORDINGS ON REQUEST THROUGH THE CLOUD, AT ANY TIME
  - PUSH SYSTEM NOTIFICATIONS
- Power supply: 6 - 15 Vdc
  - Backup battery: Lithium 2032 - 3 V
  - Consumption: min 90 mA - max 115 mA
  - Digital PIR
  - Range PIR: 12 mt
  - PIR lens: Fresnel 22 patterns on 3 levels
  - Wi-Fi standard 802.11 b/g/n
  - Camera angle: 120°
  - Camera lens: 2.8 mm
  - Camera sensor: 1/4 inch
  - Camera resolution: 160x120 - 320x240  
352x288 - 640x480 - 1024x768
  - Frame pre-post alarm: 16

Dimensions: W 65, H 130, D 40 mm

Order Code: **IF V800**: 868 MHz, white colour

**AMCPlus**

### IF800 PRO

#### Wireless volumetric detector

It is a 12 mt range wireless infrared detector with 100° angular range. It is equipped with a stand-by system when the system is disarmed. Each transmission is guaranteed through a confirmation from the receiving device, in this way no data loss and/or missed supervision can occur.

It is provided with an anti-opening tamper protection. It is also supervised (automatic life test).

The standard lithium-ions battery allows a very long duration. Thanks to the new lens design it is pet immune up to 15 kg.

Dimensions: W 63, H 114, D 40 mm

Order Code: **IF 800 PRO**: 868 MHz, white colour

### IF800/T

#### Wireless curtain effect detector

It is a wireless infrared detector, with an adjustable range from 1 mt up to 5 mt, designed to realize a "curtain shape" protection barrier useful for doors and windows or everywhere is necessary to detect a movement that happens in only one direction. It is provided with an anti-opening tamper protection. It is also supervised (automatic life test). The standard lithium-ions battery allows a very long duration. Protection class IP54. Dimensions: W 130, H 37, D 37 mm

Order Codes: **IF 800/T**: 868 MHz, white colour / **IF 800/T-M**: 868 MHz, dark brown colour

# WIRELESS SYSTEM ACCESSORIES

## 800 Series

EN 50131 / GRADE 2 / CLASS 2

Compatible with all the AMC control panels

**LARIO** | **VITA** | **KSeries** | **XSeries**

800 Series communicates with the control panel by a bidirectional digital radio transmission channel to avoid signal collisions or band saturation and ensure high stability and precision. The 128 bit AES encryption code guarantee an high security.

## Detectors

### GS800

#### Wireless glass break detector

It is a detector for the notification of glass breakage. It has an adjustable range up to 7 mt. It is provided with anti-opening tamper protection. It is also supervised (automatic life test). The standard lithium-ions battery allows a very long duration. Dimensions: W 37, H 130, D 27 mm

Order Codes: **GS 800**: 868 MHz, white colour / **GS 800-M**: 868 MHz, dark brown colour

### SS800

#### Wireless seismic detector

It is a small device; it has 2 completely separable and partitionable configurable inputs: an internal micro seismic detector and a clamped input for an external generic contact. It is provided with anti-opening tamper protection. It is also supervised (automatic life test). The standard lithium-ions battery allows a very long duration. Dimensions: W 37, H 78, D 21 mm

Order Codes: **SS 800**: 868 MHz, white colour / **SS 800-M**: 868 MHz, dark brown colour

### SF800

#### Wireless smoke detector

It is a stand-alone wireless smoke detector designed for protection of small areas. It is an optical smoke detector that uses the Tyndall effect to verify the presence of combustion particles in the air. In particular, reveals cold smoke and visible (with the combustion particles sized between 0,3 µm and 2 µm). It is equipped with a 9-volt battery and emits a modulated sound, compatible with the evacuation signal when it detects smoke. It is also supervised (automatic life test). The standard lithium-ions battery allows a very long duration. Dimensions: Ø 120, H 55 mm. Order Code: **SF 800**: 868 MHz, white colour

### SOUTDOOR800

#### Outdoor wireless detector

It is an outdoor double PIR detector, pet immune. It is a full digital detector (with 2 digital PIR), with an analysis system devoid of the classical noise that occur with the use of traditional analog PIR. Through the use of fully digital PIR, the detector is protected from white light masking and has much higher efficiency in the discrimination in its action range. Even with the significant temperature variations, the digital temperature compensation system guarantees a high efficiency. It has a range of 15 mt, with an opening angle of 90°. Protection class IP65. Dimensions: W 85, H 185, D 66 mm

Order Code: **SOUTDOOR 800**: 868 MHz, white colour

## Two-way wireless system

868 | 866 | 869.675 MHz

916 | 921 MHz

## Contacts

### CM800

#### Small magnetic contact

It is a small device; it has 2 completely separable and partitionable configurable inputs: an internal REED and a clamped input for an external generic contact. It is provided with anti-opening protection. It is also supervised (automatic life test). The standard lithium-ions battery allows a very long duration. Dimensions: W 37, H 78, D 21 mm

**Order Codes:** **CM 800:** 868 MHz, white colour / **CM 800-M:** 868 MHz, dark brown colour

### CU800

#### Magnetic contact

It has 3 completely separable and partitionable configurable inputs: an internal REED, a clamped input for an external generic contact, a clamped input for fast contacts (rolling shutter, glass brake) with adjustable sensibility. It is provided with anti-opening protection. It is also supervised (automatic life test). The standard lithium-ions battery allows a very long duration.

Dimensions: W 37, H 130, D 27 mm

**Order Codes:** **CU 800:** 868 MHz, white colour / **CU 800-M:** 868 MHz, dark brown colour

## Sirens

### PZ800

#### Indoor wireless siren

It is an indoor wireless, bitonal, piezoelectric siren. The housing is made in ABS. It is also supervised (automatic life test). The standard lithium-ions battery allows a very long duration.

Dimensions: W 73, H 123, D 47 mm

**Order Code:** **PZ 800:** 868 MHz, white cover

### SRL800

#### Outdoor wireless siren

It is a two-way supervised wireless siren. It has two different way of programming; autolearning and/or by code. It is provided with high efficiency LED light. It is powered with 3.6V 18Ah Lithium batteries included. Possibility to power with external power supply with 4V to 15V 200mA max. It is provided with anti-opening and back tampers protection. It is also supervised (automatic life test). Memory alarm signals, arm/disarm signals. Protection class IP54.

Dimensions: W 210, H 295, D 70 mm

**Order Codes:**

**SRL 800:** 868 MHz, white cover, red light

**SRL 800 WW:** 868 MHz, white cover, white light

**SRL 800 WB:** 868 MHz, white cover, blue light

# HIGH QUALITY DETECTORS

**ProLine** detectors use only digital PIRs, thus avoiding the conversion that generally must be done in traditional detectors, where the analog PIR is amplified and converted to digital.

Thanks to the **TOTALLY** digital technology, the detector is much more accurate in detecting intrusions and not suffering of alterations such as: white light, ultraviolet light, temperature, air movement due to heating/cooling systems and it is totally immune to radiated and conducted electromagnetic disturbances.

ProLine detectors are equipped with lenses designed by AMC and made by Fresnel Technologies, Inc. **LODIFF®** technology for optics realization in combination with **POLY IR®** materials make it a product with highest quality and efficiency.

All ProLine detectors are pet immune.

LODIFF® and POLY IR® are registered trademarks of Fresnel Technologies, Inc.

**IR 1**  
EN 50131-2-2 / GRADE 2  
**Digital PIR** detector with EOL resistors

**IR 1-S**

**PIR** detector with EOL resistors

**DT 1**  
EN 50131-2-4 / GRADE 2  
**Dual Technology** detector with EOL resistors

**DT 1 AM**  
EN 50131-2-4 / GRADE 3  
**Dual Technology, Anti-Masking** detector with EOL resistors

**DT 2 AM**  
CONFORM TO EN 50131-2-4 / GRADE 3  
**Dual Technology, Anti-Masking** detector with EOL resistors

**Full digital PIR**  
The detector has no analog components, the full digital PIR is connected directly to the microprocessor.

**LODIFF® Fresnel Lens Technology**  
The lens array is made by tiling pieces of LODIFF® lenses. These lenses offer significantly improved performance over typical constant-groove-width Fresnel.

**Ultraviolet stabilization**  
**POLY IR®4 material for lenses**  
The lens is molded in POLY IR® materials. These materials offer the best combination of transmittance, environmental stability, and color of any polymer. Materials available for the 8-14 micron region of the infrared.

**White light protection**  
The detector is digitally filtered from white light.

**High RFI protection**  
Thanks to the total lack of traditional amplifiers, the detector has a very high RFI immunity.

**Anti-masking**  
Anti-masking protection activated from 1 to 30 cm from the detector.

## ITALIAN DESIGN

The ProLine detectors represent the best choice for residential and industrial installations in the security sector.

## Pet immunity

ProLine detectors are pet immune up to 15 Kg, thanks to the new lens design combined with the digital analysis system.

# CURTAIN DETECTORS

## DT16

EN 50131-2-4 / GRADE 2

Dual technology detector, infrared and microwave at 10 GHz

Order Codes:

**DT 16:** white colour

**DT 16-M:** dark brown colour

Dual technology detector, infrared and microwave at 10 GHz able to create a type of protection "curtain" for doors and windows. It has an adjustable range between 2 mt and 3,5 mt. It has the back tamper, the anti-opening tamper device, a signalling LED with its disabling dip-switch and it has alarm direction recognition system.

## IF16/L

EN 50131-2-2 / GRADE 2

Passive infrared detector with high power LED

Order Code:

**IF 16/L:** white colour

Infrared detector, able to create a type of protection "curtain" for doors and windows. It has the back tamper, the anti-opening tamper device, a signalling LED with its disabling dip-switch. It has an adjustable range between 2 mt and 3,5 mt and has some special features which make it very interesting as:

- led high light output for lighting function and/or alarm
- alarm direction recognition system
- buzzer with different sounds depending on the direction of the movement
- delay system activation

## Soutdoor/T

EN 50131-2-4 / GRADE 2 / CLASS 4

Triple technology detector  
(2 PIR, 1 microwave)

\* Settable by PC

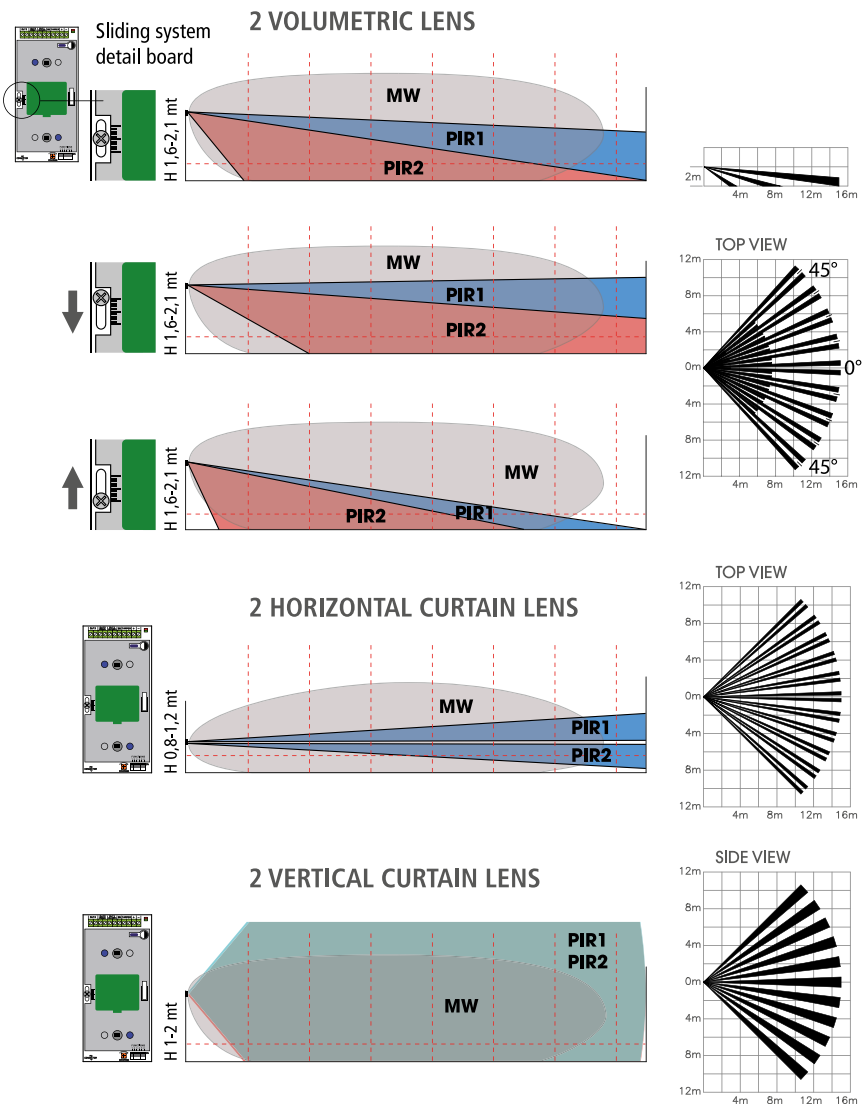

- Graphic visualization of each technology coverage
- Consultation of the statistics of violations of the individual technology for the detection of false alarms
- Free configuration of all the outputs available to the detector

- PRESET storage according to installation requirements
- Pre-alarm configuration using one or more detector's technologies
- Internal memory events, to verify which technology has generated alarm
- Double anti-masking with active IR
- No. 3 freely configurable output relays for the alarm, masking, blinding and malfunction functions
- Input of block detector (exclusion microwave when the system is disarmed)
- Trimmer coverage regulation in the function stand alone
- Led two-colour Red and Green
- No. 6 Dip switches for the various configurations

\* Possibility of changing and combining different kinds of lens for any specific requirement
